

# PRAIRIE STATE

## Generating Company

Located in Washington County, Illinois, the Prairie State Energy Campus is a technologically advanced electric generation facility utilizing domestic Illinois coal resources from its adjacent underground mine to power its 1,600-megawatt power plant. Starting with the PSGC leadership team and on through the plant personnel, our team demonstrates a deep focus on safety and we are proud to be a VPP Star Site.

# LET'S GO TO WORK

### About Enerfab

Enerfab is currently the on-site maintenance contractor at the Prairie State Energy Campus. We have been in continuous operation for 125 years and have been one of the top employers under the National Maintenance Agreement (NMA) for the last decade. We direct hire over 1 million Boilermaker hours each year and have a long-standing partnership with the International Brotherhood of Boilermakers Local 363. Safety is our #1 core value and we focus on the behavioral side of performing work safely. Come join us for the Fall!

### Contact:

International  
Brotherhood  
Of Boilermakers  
**Local 363**

2358 Mascoutah Ave.  
Belleville, IL 62220

**618-234-8843**

### Common Arc Weld Testing

Enerfab and Prairie State accept Enerfab welders certified through Common Arc.

### Pre-Employment

Enerfab will be performing 100% pre-employment drug testing, as well as random drug testing throughout the project. **\*Current MOST drug tests will be accepted.\***

# FALL 2026 OUTAGE

Looking for a great project to work on this fall? Consider the Unit 1 and 2 Major Boiler Outages for Prairie State Energy Center's 800 MW Super Critical Boiler. Enerfab, Prairie State, and the International Brotherhood of Boilermakers are looking for skilled union personnel to make this outage a great success.

### Unit 2 Planned Outage:

**September 12th, 2026 – October 10th, 2026**

### Unit 1 Maintenance Outage:

**October 12th, 2026 – October 22nd, 2026**

***\*Flip page for lodging discounts\****

### Boilermaker Work Includes:

- Boiler tube replacement (platens, economizer, primary & secondary SH)
- SCR Catalyst replacement
- Expansion joint repair and replacement
- Duct repair and much more...

### Schedule:

- Most of the work will be performed 6 days per week, 10 hours per day (2 shifts)
- Certified Heli-arc tube welders will work 7 days per week, 10 hours per day during critical tube replacement

### Job-site Amenities:

- Indoor boiler building
- Lunch - break facility (clean, heated, air-conditioned)
- Vending machines
- Secured and well-maintained parking lot
